**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-5 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Hiramoto et al. (USPN 6,745,540).

In reference to claims 1-5 Hiramoto et al. discloses a bag-making method comprising: a preliminary heating step (142) using radiation including softening of a mouth member (S), having a length of at least .5 mm, at a part (f) to be melt-bonded to a bag unit (W) while element (29) prevents an end part to be positioned within the bag unit (W) from being softened (column 14 lines 25-32); and a melt-bonding step (147) of inserting the preliminarily heated mouth member (S) into the opening of the bag unit (W) and pressing them by a sealing mold (column 15 lines 37-44).

Claim 7 states the product made by the above disclosed method is a medical bag. This limitation is not found to include a step defining the claimed method or structure specifically defining a medical bag. Moreover, the claimed method can result in a bag to be used in any desired manner.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hiramoto et al. (USPN 6,745,540) in view of Fang et al. (USPN 4,912,907).

With respect to claim 6, Hiramoto does not disclose evacuating air from the bag unit during the melt-bonding step. Fang et al. discloses a bag-making method wherein air is evacuated from a bag unit during a heating step. It would have been obvious to one having ordinary skill in the art at the time of the invention to modify the method of Hiramoto et al. to include the air evacuation step during heat sealing, since column 2 lines 1-14 of Fang et al. state that such a modification conforms the bag unit to a desired shape relative to contents (if none, will flatten bag) within bag and reduces degrading of contents within bag.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to attachment for notice of references cited and recommended for consideration based on their disclosure of limitations related to the claimed invention.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Gloria R. Weeks whose telephone number is (571) 272-4473. The examiner can normally be reached on M-F 8am-4pm.
